

1. Hero / Intro

Name:

Smrati Pandey

Positioning line (headline):

Personal Brand & LinkedIn Strategist | I Build Personal Brands That Attract Clients & Opportunities

One-line summary:

I help founders and executives turn their expertise into a LinkedIn presence people actually notice — and remember.

Social links:

- LinkedIn: <https://www.linkedin.com/in/smratipandey/>
 - Email: [your professional email] smratipandey20002gmail.com
-

2. About Me

- Your written About (the "curious girl" version we built)

Hi, I'm Smrati, a LinkedIn ghostwriter and personal branding strategist.

I help founders and executives build a presence that attracts opportunities through story-led content. No AI-flat posts. No posting just to post.

I come from a marketing and MBA background, and today I write LinkedIn content for founders and C-suite executives turning their expertise into words people actually stop and read.

I'm endlessly curious about human psychology and what makes people pay attention. That's the lens everything I write comes from.

If your expertise deserves more visibility than your LinkedIn currently gives it, let's talk.

3. Services

- Scannable list with one-line descriptions each:

LinkedIn Ghostwriting & Strategy

Content built on real strategy — designed to build authority and stay true to your voice.

- **Executive Personal Branding**

Positioning founders and leaders as credible, recognizable authorities in their space.

- **Profile Optimization**

A complete rebuild of your LinkedIn profile, positioned to attract the right audience and opportunities.

- **Email Campaign Writing**

Sequences designed to nurture and convert, built and tracked through platforms like Mautic.

- **Cold Outreach Messaging**

Personalized outbound messaging engineered to start real conversations.

- **Video Scripts (Reels/Shorts)**

Scripts built around attention and retention, for Instagram Reels and YouTube Shorts.

- **Landing Page & Ad Copy**

Copy that translates your product's value into language your audience actually acts on.

- **Speaking / Career Mentorship Sessions**

Delivering LinkedIn strategy and personal branding sessions for students, professionals, and career changers.

4. Executive Content — CEO LinkedIn

(renamed from "LinkedIn Executive Content" to be specific and honest)

- 3-4 post screenshots from the CEO's profile
- Each with: one-line caption + real metrics underneath (impressions/reactions)
- Optional line under the section header: "Strategy, writing, and content management for CEO's LinkedIn presence" — this still shows you handle executive-level work, just names the one profile you have proof for

Strategy, writing, and content management for CEO's LinkedIn presence

Post 1: "AI Writes Code Faster"

A reflection on how teams start with excitement, but speed alone doesn't build lasting products.

Post 2: "What Makes Us Iqonic"

Hindustani Modi • You
Founder | Building Scalable SaaS, AI & Digital Products | Helping startups launch...
9mo • Edited •

What Makes Us *Iqonic* **IQONIC**?
It's not the technology.
Technology can be copied.
It's not the products.
Products can be replaced.

It's the people.

Not just any people the right kind of people.
People who take ownership without being asked.
Who care about the small details no one else notices.
Who do the hard work when no one is watching, and the smart work when everyone else is stuck.

What makes us iqonic is not that we always get it right on the first try.
It's that we refuse to stop until it is right.

Clients don't just get a platform when they work with us.
They get the weight of a team that treats their idea as if it were our own.
That's rare. And it's why what we deliver feels different.

Because culture shows up in code.
It shows up in design.
It shows up in results.

And our culture is simple:
Do the work with integrity.
Do it with care.
Do it with hunger.

That's what makes us *Iqonic Design*.

Post 3: "Streaming Isn't the Future of TV — It's TV"

Hindustani Modi · You
 Founder | Building Scalable SaaS, AI & Digital Products | Helping startups launch...
 Bmo · 🌐

Streaming isn't "the future of TV" anymore.
 It is TV.

This July, in the U.S., streaming captured 47.3% of all TV usage nearly equal to cable and broadcast combined. YouTube (13.4%) and Netflix (8.8%) alone now rival entire TV networks.

But here's the flip side: subscription growth is stalling. The average household already pays for four services. The ceiling is real.

The answer? Advertising.

Ad-supported tiers now drive over 25% of new sign-ups in mature markets. Roku's free channel surged 7.5% in July. Netflix's ad tier accounts for more than half of its new subscribers.

This isn't a side shift. It's the new foundation.

Future revenue in streaming won't come from adding a 5th subscription it will come from smarter monetization, from AVOD to FAST channels.

Streaming has already won the distribution war.
 Now the real battle is about economics.

Platforms that master ad-driven scale while keeping audiences hooked will define the next decade.

#streaming #netflix #tv #stream

Platform	Subscription	Ad-supported
Netflix	~40%	~55%
Roku	~38%	~75%

4b. Profile Optimization — CEO LinkedIn (Before/After)

Metric	Before	After
Headline	No title mentioned	Added "Chief Executive Officer"
Followers	3,358 (actually grew from 2971)	3,608
Post Impressions (7-day)	5,038	21,097
Profile Views (7-day)	1,007	1,219
Search Appearances (7-day)	54	47

Caption: Repositioned the CEO's headline to lead with his title and value proposition, alongside a banner refresh with a clear CTA ("Book a Consultation").

Result:

-  Post impressions grew from 5,038 to 21,097 (7-day snapshot)
-  Follower count grew from 2,971 to 3,608
-  Profile views increased from 1,007 to 1,219

6. Event Campaigns — CEO LinkedIn

Ran a content and outreach campaign around the CEO's attendance at GITEX Global 2025 in Dubai combining pre-event announcement posts, live event coverage, and personalized outreach to attendees, resulting in secured meetings on the ground.

Post 1: Pre-Event Announcement

Post 2: Day 2 Recap

Hindustani Modi • You

Founder | Building Scalable SaaS, AI & Digital Products | Helping startups laun...
7mo • 🌐

Even tried to grab lunch... ended up in 3 back-to-back demos instead. 😅

Didn't think Day 2 could top yesterday turns out I was wrong. ⚡
Every corner at #GITEX feels like walking into the future.
AI that builds, robots that think, founders that don't stop.

If this is what Day 2 looks like, I can't imagine what's coming next.
Dubai, you're unreal. 🌍

A personal, story-led moment from the event an unexpected connection made during travel, humanizing the brand's presence at a global tech event.

 3,917 impressions · 138 reactions · 12 comments

Alongside content, ran personalized outreach to GITEX attendees ahead of the event, resulting in secured on-ground meetings.

7. Full-Funnel Case Study — Streamit

Context:

Streamit needed a stronger, more credible brand presence to compete in the OTT/streaming platform space spanning its website, content, and outbound relationships with potential clients.

What I did:

- Rebuilt the landing page content strategy, repositioning it in a high-enterprise product tone
- Created and wrote the lead magnet, plus built contact form landing pages using Lovable
- Wrote video scripts for Instagram Reels and YouTube Shorts, focused on individual Streamit features generated videos using HeyGen and visuals using Higgsfield
- Set up and optimized Streamit's YouTube channel
- Managed LinkedIn content strategy and posting for the brand
- Wrote and sequenced email campaigns, deployed through Mautic
- Ran personalized outreach to OTT platform owners, including custom audit reports showing how Streamit could benefit their platform

Result:

- A founder testimonial captured on video, stating unprompted: *"If I ever build anything else, I'm calling them first"* a direct reflection of the trust built through this outreach and brand work
📊 3,965 impressions · 108 reactions · 36 comments · 8 reposts on the testimonial post

8. Full-Funnel Case Study — Kivicare (dentist)

Context:

KiviCare needed to expand into the dental clinic niche, targeting dentists in India and overseas to show how the platform could make their practice more patient-focused and digitally accessible.

What I did:

- Built a dedicated lead magnet and landing page for the dentist niche, created using Lovable
- Wrote outreach messaging specifically for dentists, both in India and overseas, focused on helping them build a more patient-friendly, modern website
- Ran outreach across two channels — Instagram and Email — writing message sequences for both, with emails set up and tracked through Mautic
- Led a team of 4 people executing this outreach over a 2-3 month campaign
- Simultaneously created outreach messaging for a second team working on a different niche
- Tracked and analyzed outreach performance, delivering regular reporting

Result:

Ran a sustained, two-channel outreach campaign over 2-3 months, led a 4-person team executing it, and supported a second team's outreach for a separate niche in parallel — with ongoing performance tracking and reporting throughout.

9. Agency Case Study — Iqonic Agency

Context:

Iqonic Agency was introduced as a new offering by the company, needing both a credible content presence and an active outbound lead generation engine to start bringing in clients.

What I did:

- Built the content strategy for Iqonic Agency's case study pages, shaping how the company's work was presented to potential clients
- Ran outbound lead generation for Iqonic Agency, primarily through LinkedIn, using Apollo and Sales Navigator data across 3 separate LinkedIn accounts
- Continuously tested and evolved outreach messaging to improve reply rates, rather than running a single static script

Result:

Built and maintained a multi-account outbound lead generation system for a newly launched agency offering, with an iterative approach to message testing aimed at improving response rates over time.

10. Team Leadership

Context:

Alongside my own content and outreach work, I mentored a marketing trainee and led a team of 4 people during the KiviCare dentist outreach campaign.

What I did:

- Mentored a marketing trainee across content and outreach activities, guiding them through LinkedIn content writing, profile optimization, and outreach fundamentals
- Led a team of 4 people executing the KiviCare dentist outreach campaign across Instagram and email
- Created outreach messaging and direction for a second team working on a separate niche in parallel

Result:

The trainee I mentored successfully transitioned into a full-time employee. Also led a 4-person execution team through a 2-3 month outreach campaign, with a second team supported in parallel.

11. Mentoring & Speaking — Ek Pehel (put images)

Context:

Since December 2025, I've run LinkedIn career guidance sessions at Ek Pehel Institute for students, job seekers, interns, and career re-starters. I've also spoken at a semi-government school, running an AI awareness session for 9th and 11th standard students. For each session, I built the presentation content myself.

Sessions delivered so far:

1. **LinkedIn Career Guidance Session — Ek Pehel (1st session)**
Focused on visibility over credentials — helping students understand that skills alone don't get noticed; a clear profile, purposeful networking, and showing up consistently does.
2. **LinkedIn Career Growth Session — Ek Pehel (2nd session)**
Focused specifically on visibility as a skill — introducing students (including 11th standard attendees) to LinkedIn early, before they enter the job/opportunity race.
3. **AI Awareness Session — Semi-Government School**
Delivered to 9th and 11th standard students, covering how to use AI smartly and

responsibly for their studies, alongside broader awareness to support their growth and future opportunities.

What I did:

- Designed and delivered all three sessions independently, including building the presentation (PPT) content for both the LinkedIn sessions and the AI session
- Adapted content and language for different audiences — early secondary school students vs. career-ready young adults

Result:

Delivered 3 sessions to date 2 LinkedIn career/branding sessions at Ek Peהל and 1 AI awareness session at a semi-government school each with self-built presentation content, reaching students across different educational stages.

12. Testimonials

"Smrati is an exceptional content writer with the ability to think beyond AI-generated content. She has a strong understanding of content strategy and consistently delivers well-researched, thoughtful, and engaging content across a wide range of topics. Before writing, she takes the time to study each subject in depth, develops a thorough understanding of the domain, and captures the perspective of a subject matter expert."

— Karan Barad, Brand & Visual Strategist, Iqonic Agency

"Smrati, being the best in business as soon as she joined us. She is an expert in LinkedIn and also the amount of questions she would ask before taking up the work shows how sorted her workflows are."

— Hindustani Modi, Founder & CEO, Iqonic Design

"Working with Smrati has been a genuinely positive experience. She's calm, disciplined, and someone who approaches her work with a lot of sincerity. While managing my LinkedIn profile, she took the time to understand my perspective, communication style, and audience, which made the content feel natural and authentic."

— Rahul Singh, Chief of Growth Strategist

"She brings smart strategic thinking along with excellent execution skills. Her marketing approach is practical, creative, and results-driven."

— **Bhoomin Naik**, Chief Product Officer

13. Tools I Use

Category	Tools
